

Overview:

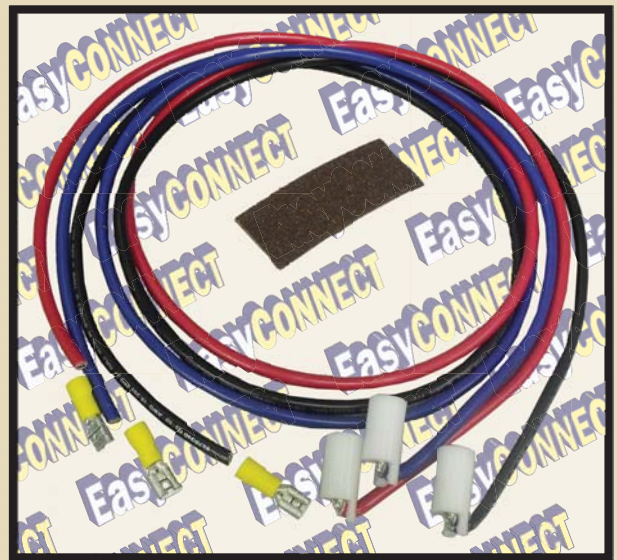

The EC10 Easy Connect Compressor Terminal Connection Kit provides a fast, easy and safe option when compressor wires need to be replaced. For use in compressors up to 5 hp, each of the three 10 gauge (AWG) wires includes a Delrin terminal plug, providing excellent insulation between compressor contacts.

Product Specifications:

- There are three compressor wires in each package.
- Each compressor wire is either 2 or 3 feet long. (depending on package).
- The compressor wire is marine grade, 10 AWG, 103 stranded, tinned copper.
- Connector is made from Delrin plastic: a high strength insulation material that is non-conductive to 10,000 Volts.
- Each package includes three (3) spade connectors
- Each package contains sand paper for cleaning terminals before installation.
- Delrin connectors simply push onto the compressor terminal, no tools required for installation.
- Made in U.S.A.
